

The Circle

Radius

A line from the middle to any point on the outside of the circle.

Diameter

A line drawn from any point on the circle, through the middle, and continuing to the opposite side.

Circumference

The distance around the edge of a circle.

Area

The space covered by the inside of the circle.

Chord

A line joining any two points on the outside of the circle.

Arc

Part of the outside of the circle.

Sector

The space enclosed by two radii and an arc.
